SCHALINS
OF SWEDEN

Quality Certificate

A ring from Schalins is a Swedish handcraft and all our rings are 100 % manufactured at our facility. In order to secure full control of content and quality, we melt and alloy the gold ourselves, the quality is then verified by the Technical Research Institute of Sweden.

All our diamonds are conflict-free in accordance with the Kimberley Certification Scheme and we mount them ourselves, which guarantees top quality. Our diamond rings comes with a 2-year guarantee; if a stone/s comes loose during the guarantee period due to normal wear and tear, we will replace the stone/s or ring – provided that the ring has not been altered in any way, for example when it comes to size and mounting of stones etc. All such alterations will have to be performed by Schalins Ringar, in order for the guarantee to be valid. Please visit schalins.se for more information.
